

Construction and Design Manual Treehouses

“When Andreas Wenning invited me to visit his treehouse, I was initially sceptical”, admits Eberhard Syring in the preface of this book and proceeds: “I associated the term ‘treehouse’ with a whole range of clichés. It made me think of DIY dads (...) I thought, the treehouse is a marginal note in architecture – but is it really a subject to be taken seriously?” – Yes, it is indeed.

This book presents 25 innovative examples of contemporary treehouses and 10 conceptions of treehouses created by Andreas Wenning. With large-scale photos and substantial essays on questions of statics and construction.

Andreas Wenning, born in 1965, architect. Studied architecture in Bremen, worked for firms in Germany and Australia. 2003 founded *baumraum*, projects in Europe, Brazil, and the United States. Lectures and teaching work, numerous publications in Germany and abroad.
